MARVIN S. BOWMAN
Capt., Air Corps
Intelligence Officer.

Flak was first reported coming from London. This fire was reported as an intense barrage in the distance to the right. One crew reported seeing guns being fired from a small peninsula at 43°05'N - 05°58'W. At Harwell one crew which flew with the 96th group reported seeing something shot into the air that exploded level to low off to our left with a big flash & black smoke, it then fell very slowly as though attached to a parachute and flamed all the way down. Three of these were seen. At the I.P. about 50 bursts of tracking fire in bursts of four which were low to level were reported. This fire was inaccurate as to our right. At the target meager, seem, inaccurate tracking fire was encountered which was level and off to our right. Two runs were made over the target and none of our ships received any flak damage. No flak was reported seen or encountered by the 100th group on the return trip from the target area to England.

10. A description of flak en route and at target, including if possible, suggestions as to type of fire control employed. Include herein any phenomena or comments.
